ISBN 978-3-86388-735-3

Transnational civil society networks have become increasingly important democratizing actors in global politics. Still, the exploration of democracy in such networks remains conceptually and methodologically challenging. Practice theory provides a framework to study democracy as routinized performances even in contexts of fluid boundaries, temporal relations and a diffuse constituency. The author attempts to understand how new forms of democratic practice emerge in the interaction between political actors and their structural environments.
