Tecuci, September 2011

Dear Madam, Dear Sir,

I am a first-year MA student of the Political Science Department, at the University of Bucharest, Romania, enrolled in the MA programme of "Comparative Politics" and I am conducting a **research project** titled "A Comprehensive Inquiry into the Local Political Elites of East-Central Europe. A Comparative Approach of Tecuci (Romania) and Česká Lípa (the Czech Republic)". As I am planning two case studies on the topic of local elite, I have chosen to study the Municipal (Local) Councils of the two towns: the first is my native town, the second, Česká Lípa, is similar to the former, but it is definitely a more successful case of local leadership. The research is intended as my final paper for the MA dissertation.

As a consequence, I kindly invite you to participate to this research project on the local political elites, by filling in the following questionnaire. This questionnaire was administered also to the members of the Local Council of Tecuci and it represents one of the main research methods that the research I am conducting employs. The time for the filling in the questionnaire below is of approximately 5 to 10 minutes. In most cases, you will have to check only one answer. For the questions nos. **4**, **5**, **6**, **7**, **8**, you can choose more than one answer, but no more than three. Questions nos. 14 and 16 are open-ended questions which will need from you a personalized answer.

I would like to remind you that the option to answer the questionnaire is totally voluntary. Also, if you prefer not to answer a specific question, you will have the complete liberty to do so. What is also important is the fact that all information provided by your answers is confidential, bearing exclusively a purely didactical, academic scope. The questionnaire has an anonymous character.

The administration of the present questionnaire was made possible through Misses Hana Moudrá's agreement and support, Mayor of Česká Lípa¹. I would like to remind you that this questionnaire has a voluntary and anonymous character and an academic scope.

I would like to thank you very much for your patience in filling in the questionnaire and for your cooperation to this research project. I appreciate the time, the attention and the effort you put in filling in the attached questionnaire. I am deeply grateful.

With much appreciation and consideration,

Roxana Marin, MA student in "Comparative Politics", Political Science Department, University of Bucharest, Romania

¹ To be obtained via e-mail, through written accord.

- 1. In your case, what is the major motivation for becoming involved in politics?
 - a. Politics is my way of life
