Is Japan prepared for an ethnically diverse society? The volume examines the past and future trajectory of Japan's immigration and integration policies and related institutions, taking a cross-disciplinary approach in social sciences. The authors highlight critical issues and challenges that the nation is facing as a result of the government's inarticulate migrant-acceptance policy, e.g. in the fields of deportation, refugee policy, multicultural education and disaster protection. How can the situation be improved? The book investigates the changes and initiatives needed to build a resilient policy regime for a liberal, pluralistic, and inclusive Japan.
